

NASHVILLE

SEPTEMBER 8-10, 2026

Convince Your Boss Toolkit

At HIP Conf 2026 in Nashville, we're redefining resilience.

In today's threat landscape, protecting the hybrid identity infrastructure isn't just about recovering from attacks. It's about building an identity security foundation strong enough to withstand disruption, adapt in real time, and emerge stronger.

Need to make your case? Build your rationale—and share HIP value with your approver.

4 reasons you should attend HIP Conf 26

1

Real-World Identity Security Strategies

Walk away with practical approaches you can apply immediately across Active Directory, Entra ID, and hybrid environments.

2

Learn from Practitioners and Experts

Hear directly from those solving today's toughest identity security challenges in real environments — not just theory.

3

Earn CPE Credits

Gain valuable Continuing Professional Education (CPE) credits while investing in your professional growth.

4

Build Industry Connections

Network with peers, security leaders, and the broader identity community in a setting designed for real conversations.

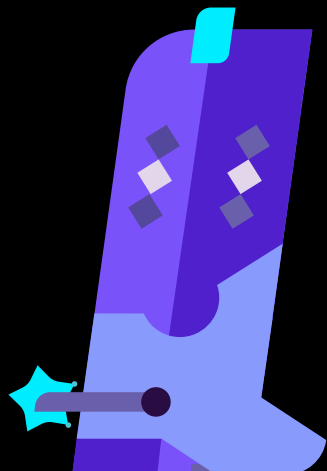

Bonus: Experience Nashville

Make the most of your time in a city where Southern charm meets a vibrant music and culture scene.

- Live music on Broadway Nashville — energy, nightlife, and iconic Nashville vibes
- Must-see venues like Ryman Auditorium — rich history and legendary performances
- Rooftop dining + networking — unwind, connect, and take in the city views

NASHVILLE

SEPTEMBER 8-10, 2026

Why send me to the Hybrid Identity Conference in 2026?

HIP Conf aligns directly with our current security priorities and provides a high-impact opportunity for learning and networking in a focused setting.

When I attend, I'll bring back the latest insights and cutting-edge practices to help us stay ahead of new threats, improve our security posture, and make our business operations more resilient against attacks.

Here's how HIP attendance aligns with our business priorities:

Support Key Security Initiatives

HIP Conf sessions map directly to priorities like Zero Trust, identity threat detection and response (ITDR), and Active Directory security.

Strengthen Identity Resilience Across the Organization

I'll get current, actionable strategies to reduce risk across identity systems, from prevention to crisis management to recovery.

Share Insightful Knowledge

I'll return with clear recommendations, best practices, and ideas that I'll share across our team.

Maximize ROI on Training and Development

With HIP Conf, we'll consolidate learning, networking, and strategy into one focused event instead of multiple trainings.

Stay Ahead of Emerging Threats

We'll tap into the latest research so we can understand how the threat landscape is evolving—and what leading organizations are doing to stay resilient.

Bonus: Keep Our Team Learning Before and After the Event

The HIP Community dovetails with conference learning, helping us stay on top of our game all year.

- **On-demand sessions:** We can catch up on practical techniques from previous HIP Conf events—and get quick value from monthly virtual events. hipconf.com/resources/
- **Connect with HIP thought leaders:** Our organization can build our cybersecurity coalition by connecting with global identity and access management experts, Microsoft MVPs, and industry peers. hipconf.com/leaders/
- **Hybrid Identity Protection Podcast:** Leaders and team members alike can stream compelling, relevant discussions for hybrid identity defenders. hipconf.com/podcasts/
