HYBRID IDENTITY PROTECTION conf 27

FRANKFURT
FEBRUARY 09, 2027

Hosted by semperis

At the Hybrid Identity Protection Conference, we're redefining resilience.

5 reasons you need to be at HIP Conf Europe 27

Protecting hybrid identity infrastructure isn't just about recovering from attacks. It's about building an identity security foundation strong enough to withstand disruption, adapt in real time, and emerge stronger.

1 Learn real-world identity security strategies

Walk away with practical approaches you can apply immediately across Active Directory, Entra ID, and hybrid environments.

2 Learn from seasoned practitioners and experts

Hear directly from those solving today's toughest identity security challenges in real environments — not just theory.

3 Build industry connections

Meet with the brightest minds in identity security—industry leaders, practitioners, and vendors from across EMEA—who can help you solve complex challenges and advance your career.

4 Earn CPE Credits

Gain valuable Continuing Professional Education credits while investing in your professional growth.

5 Expand and share your knowledge

Swap real-world incident response success stories and lessons learned from the trenches. Learn how front-line responders deal with complex identity breaches, ransomware, and other destructive attacks.

Bonus: Frankfurt, Germany

Enjoy a world-class city known for its blend of historic charm and modern skyline, riverfront walks, museums, and vibrant culinary scene. Make the most of your trip by exploring this wonderful city.

Give the next page to your boss or approver to build your case for HIP Conf attendance.

HYBRID IDENTITY PROTECTION conf 27

FRANKFURT

FEBRUARY 09, 2027

Why send me to the Hybrid Identity Conference in 2027?

HIP Conf aligns directly with our current security priorities and provides a high-impact opportunity for learning and networking in a focused setting.

When I attend, I'll bring back the latest insights and cutting-edge practices to help us stay ahead of new threats, improve our security posture, and make our business operations more resilient against attacks.

Here's how HIP attendance aligns with our business priorities:

Support Key Security Initiatives

HIP Conf sessions map directly to priorities like Zero Trust, identity threat detection and response (ITDR), and Active Directory security.

Strengthen Identity Resilience Across the Organization

I'll get current, actionable strategies to reduce risk across identity systems, from prevention to crisis management to recovery.

Share Insightful Knowledge

I'll return with clear recommendations, best practices, and ideas that I'll share across our team.

Maximize ROI on Training and Development

With HIP Conf, we'll consolidate learning, networking, and strategy into one focused event instead of multiple trainings.

Stay Ahead of Emerging Threats

We'll tap into the latest research so we can understand how the threat landscape is evolving—and what leading organizations are doing to stay resilient.

The HIP Community extends benefits beyond the conference, helping us stay ahead of threats all year with on-demand sessions, world-class thought leadership, and the industry-leading HIP Podcast featuring compelling insights from hybrid identity defenders and leaders. Learn more: hipconf.com
